HONEYstick™

FOR USE WITH OILS

User Manual

USER MANUAL

Read and Follow all operational instructions found within this Important Product Information Guide, which contains safety and handling, and regulatory information for the Honey Stick™ Sub-Ohm Oil Kit.

WHAT IS THE HONEY STICK™ ?

The Honey Stick™ is a revolutionary personal electronic vaping device that converts CO2 extracts, essential oils (including THC and CBD oils, where legally permitted), and/or e-liquids into an inhalable vapor, rather than through combustion and burning.

HONEY STICK™ SUB OHM OIL KIT CONTENTS

1x Honey Stick™ Sub Ohm Tank (0.3Ω)
1x Honey Stick™ Smart Mod (36W)
1x Micro USB Charging Cable
1x 3ml 70/30 PG/VG Coil Primer
1x Neck Lanyard

HONEY STICK™ SUB OHM OIL TANK

Honey Stick™ Tank Features:
- Sub-Ohm - Ultra Low Resistance (0.3Ω)
- Organic Cotton Coil (OCC)
- Top Fill 2.0ml Pyrex Reservoir
- Variable Airflow Control
- Tight Seal / No Leakage Gaskets
- Wide-Bore Mouthpiece w/ Mesh Safety Screen
- Optimized for Intense Vapor and Accentuated Taste

FILLING THE HONEY STICK™ WITH OIL

1) MOUTHPIECE: Remove mouthpiece by unscrewing it from the top of the tank, exposing the yellow colored filling ports.

2) AIR FLOW: Make sure the airflow holes are completely closed by rotating the variable airflow control dial so that no open holes are exposed.

If refilling a previously used tank, skip to step 4.
3) COIL PRIMER: If using the tank for the first time, or if extended period of time since last use, the tank needs to be primed. Drip 2-5 drops of 70/30 PG/VG coil primer (included in kit) down the center hole of the tank, allowing it to drip directly into the heating coil.

FILLING THE HONEY STICK™ WITH OIL (con't)

4) FILLING WITH OIL: Insert syringe into the moon shaped opening and slowly, and evenly, discharge the syringe's oil into the tank's reservoir so that it saturates the heating coil evenly. Do this by rotating the syringe's angle while discharging its contents. All of the heating coil exposed openings should be covered with oil. DO NOT PUT OIL DOWN CENTER HOLE.

- NOTE: If the oil is very thick and doesn't smoothly flow, utilize a lighter to apply slight heat to the glass portion of the tank, just enough to make the oil flow easier to evenly distribute it on the heating coil's openings.

- NOTE: Please note that when filling the syringe should only be inserted to the depth where you can see a few millimeters of it through the glass.

FILLING THE HONEY STICK™ WITH OIL (con't)

5) MOUTHPIECE: Firmly rescrew the mouthpiece cover back on to the top of the Honey Stick™ tank.

* The Honey Stick™ Oil Tank is now ready for use.

TRY OUR FILL-IT-YOURSELF (FIY) KIT
Looking to cut and mix your own oils for the Honey Stick™? With the Honey Stick's™ Fill-It-Yourself (FIY) Kit, all the tools you need for optimized oil vaping are at your finger-tips.

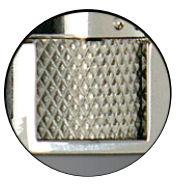
HONEY STICK™ SMART MOD

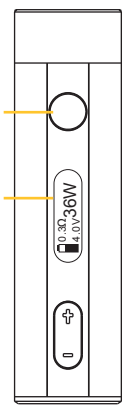
Honey Stick™ Smart Mod Features:
- Variable Wattage: 5W to 36W / Variable Voltage: 2V to 8V
- Ohm Capability: 0.3Ω to 3.0Ω
- Built-in 2600 mAh 20a Battery / Micro USB Rechargeable
- 510 and eGo Threaded (w/ conversion adapter)
- OLED Digital Display Screen
  * Wattage, Voltage, Resistance, Vaping Time, Battery & Charging Levels
- Overcharge, Low-Voltage, Short Circuit Protection.

NOTE: Your Honey Stick™ Smart Mod comes charged and ready to use right out of the box.



HONEY STICK™ SMART MOD (con't)

Attaching the Tank to the Mod:
With the The Honey Stick™ Sub Ohm Tank properly filled with oil, and heating coil primed, it is now ready to be affixed to the Honey Stick™ Smart Mod for use. Simply screw the tank on to the mod battery hand-tight, making sure not to over-tighten.



The Mod comes Locked! ***TO UNLOCK:*** 1) With power to the unit on, press and hold the (+) button until a lock icon appears on the OLED screen. 2) While continuing to hold the (+) button, press and hold the "Power" button until the lock icon displays as "unlocked" on the OLED screen. The Honey Stick™ is now unlocked and ready for use. ***TO RE-LOCK:*** Repeat above steps, however, you want to see the lock icon change from the "unlocked" position to "locked."

USING THE HONEY STICK™ SMART MOD

Now it is time to Vape!

1) Press and hold the power button
- For first time tank use, press and hold the power button for five (5) seconds to allow the priming process to occur within the heating coil before you inhale. Subsequent uses will not require this extended hold.
2) Inhale from the drip tip / mouthpiece.
3) Once you have taken a satisfactory draw from the mod, release the power button.
* Repeat each time you would like to take a draw from the Honey Stick™.

Adjusting Variable Airflow:

WHILE TANK IS FILLED AND ATTACHED TO BATTERY, adjust airflow to the tank by rotating the airflow control dial to increase or decrease the amount of air passage into the tank.
* Increased airflow may cause a quicker rate of vaporization, resulting in more frequent refillings of the tank.

ADJUSTING HONEY STICK'S™ VOLTAGE / WATTAGE

With Mod power on, press the power button three (3) times to access voltage/wattage mode. Adjust the voltage/wattage by pressing the plus (+) to increase, or the minus (-) button to decrease voltage/wattage. The voltage is adjustable from 2V to 8V, and the wattage can be increased up to 36W. Once desired voltage/wattage is reached, press the power button three (3) times to exit this mode and return back to regular use.

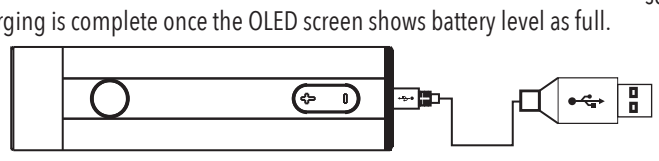
Always start at the lowest voltage and slowly increase until you find the optimum operating voltage for your attachment. Ideal voltage range may vary by attachment and user preference. Please use trial and error to dial in the ideal power used to operate the Honey Stick™ Sub Ohm Tank and Smart Mod to your desired likings.

NOTE: Using a high voltage with certain attachments may cause a burnt taste or damage to your attachment.

RECHARGING THE HONEY STICK'S™ BATTERY

After prolonged use, once the indicator light on your battery begins to flash or if the vapor begins to diminish in volume, it is time to recharge the Honey Stick's™ internal battery.

1) Plug the Micro USB port into the bottom of the Honey Stick's™ case.
2) Plug the USB connector end into any live USB port of a computer or supporting device - the power button will flash 3 times, and the power state will show within the OLED screen.
3) Charging is complete once the OLED screen shows battery level as full.



WARNINGS & DISCLAIMERS

Please read the below carefully and thoroughly.
Read the following safety recommendations before using your device. Keep this user manual in a secure area for future reference.

- Refrain from using this product if you are under the legal smoking age in your state, if you are a non-smoker, if you have demonstrated an allergy or sensitivity to any combination of inhalants, if you are pregnant or breast-feeding, or if you have heart disease, diabetes, high blood pressure or asthma. This device is not a medical device, nor is it intended to diagnose, cure, treat, or prevent any disease or other conditions. Likewise, it is not a smoking cessation device. If you have any health concerns or issues, please consult with your physician prior to using the device.
- Avoid direct contact and ingestion of the cartridge/filter's e-liquid or oil substance as it is concentrated and meant to be vaporized and released incrementally.
- The device is not intended for use with illegal substances of any kind and using such will void the warranty. Any illegal use of this device could subject the user to severe fines, penalties, and/or imprisonment under the law of your jurisdiction.
- Honey Stick™ is not responsible for any damage or personal injury caused by the irresponsible, incorrect, or inappropriate use of the device.

WARNINGS & DISCLAIMERS (con't)

- Please note that dropping this device may cause it to no longer operate properly. Avoid contact with metal articles in your pocket, wallet, or other bags as this may result in short circuiting, heating or damage to the battery as a product of the conduction of electricity through the unit.
- Avoid Water and Wet Locations. Do not use the device in the rain, near washbasins or other wet locations. In the event that your unit gets wet, unplug all cables before cleaning, and allow it to dry thoroughly before using it again. Do not attempt to dry the device with an external heat source, such as a microwave oven or hair dryer.
- Do not use attachments or accessories that are not recommended by the manufacturer. Honey Stick™ is not responsible for the operation of, or any damage caused by, third-party accessories or their compliance with safety and regulatory standards.
- The device contains small parts which may present a choking hazard to small children. Keep the device, its parts and its accessories away from small children at all times.
- Never attempt to repair or modify the device yourself. The device does not contain any user-serviceable parts. The maintenance and repair of the product shall be conducted by the customer service department of the company only. The company takes no responsibility for any loss caused by abnormal use or intentional or careless misuse of the product.

WARNINGS & DISCLAIMERS (con't)

This product has not been approved by the United States Food and Drug Administration. Keep out of reach of children. Refrain from using this product if you are under the legal smoking age in your state. This product is not an aid for smoking cessation.

LIMITED MANUFACTURER'S WARRANTY

Honey Stick™ provides a 60 day replacement warranty on the Smart Mod, covering manufacturer defect of the vaporizer's battery and related components. Returns on Honey Stick™ Tank only accepted on NEW / UNOPENED tank packages.

In the event that your product fails to operate satisfactorily, please email support@vapehoneystick.com or call the customer service department at 1-888-420-8858 to attempt to troubleshoot any possible issue and/or receive exchange instructions.
